

Tile Neel
COMMERCIAL GROUP

Using modern science and state-of-the-art technology, specialized personnel, high-tech equipment as well as industrial and advanced machinery, Neel Trading Company has managed to produce high-quality products, with years of experience in the field of production and exports of different types of ceramic tiles. This company is proud to mention that the number of customers in this company is increasing daily due to the high quality of products and their unique diversity.

Products

Types of tiles:

- Glass tiles:

Neel Trading Company presents glass tiles in different designs, colors and dimensions, which give a special beauty and positive vibe to the home or work environment. Glass tiles or glass mosaic are similar to ordinary tiles; however, they are made of glass, that is, small pieces of glass are connected with a mesh and create the special beauty and radiance.

These types of tiles can be used in various places such as kitchens, bathrooms, elevators, luxury buildings and so on. These tiles are very heat resistant, washable, and have a consistent color.

- Ceramic tiles:

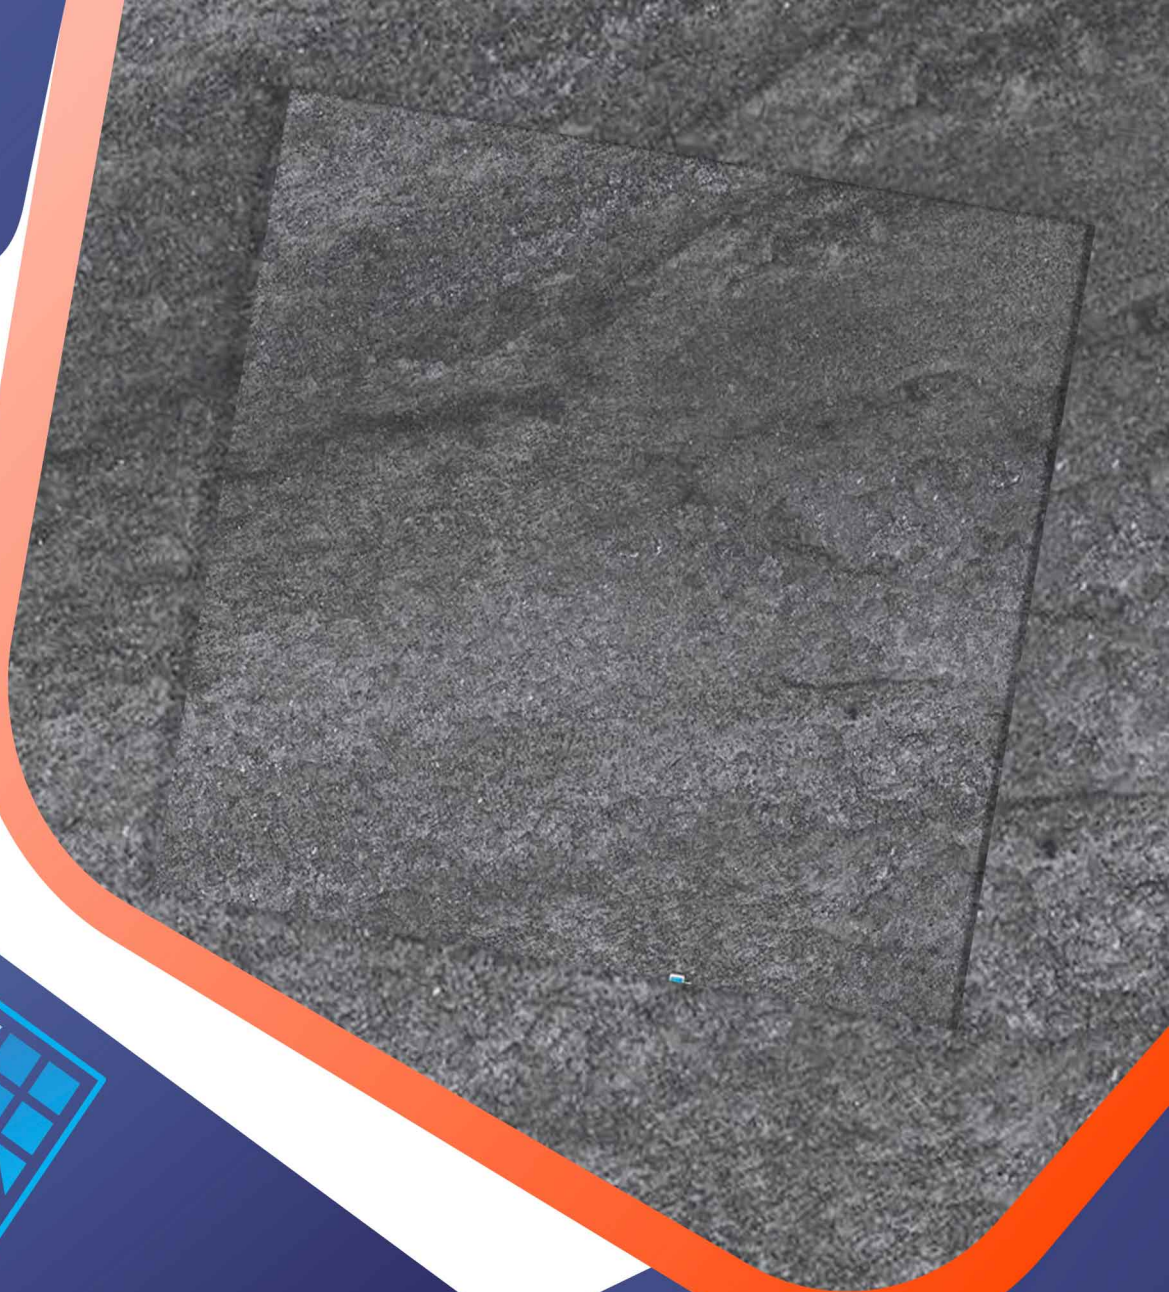

Neel Company Ceramic Tiles are one of the most important products in the building industry, which is used as a coating on walls or floor space. These products help prevent the penetration of moisture and have a huge diversity of colors. These types of tiles have a smooth and polished surface that can be easily cleaned.

-Pavement tiles:

These tiles look almost like bricks; however, they are not as thick. This type of tile is utilized to pave the floors and bathrooms and there is no need to fill the gap between the tiles.

-3D tiles:

Neel company 3D tiles have very beautiful and attractive designs and are produced in a variety of designs and patterns. This type of tile is used to pave the floor and be installed on walls of places such as swimming pools, restaurants, commercial complexes, as well as in the lobby of hotels and buildings, bathrooms, kitchens, etc. These are very high-quality tiles that are highly resistant. they are washable, anti-scratch and anti-acid.

- Cement tiles:

Neel company introduce these types of tiles with high quality. To produce them, first the raw material is poured into molds of different shapes, then it is removed from the mold and dried either naturally or in an oven. In order to color this type of tile some special paints are utilized in its raw material. To prevent the penetration of moisture and increasing their resistance, after laying the tiles on the floor or installing them on the wall the process of filling gaps between the tiles must be performed.

- Unglazed Tile:

Unglazed tiles are very hard and resistant to abrasion and are used for spaces such as bathrooms and kitchens.

-Porcelain tiles:

Neel porcelain tiles are very resistant to liquids and stains and are one of the strongest types of tiles in terms of resistance. In the production of this type of tile, fire resistant materials are utilized. Porcelain tiles are also easy to clean and have a long shelf-life.

- Mosaic tiles:

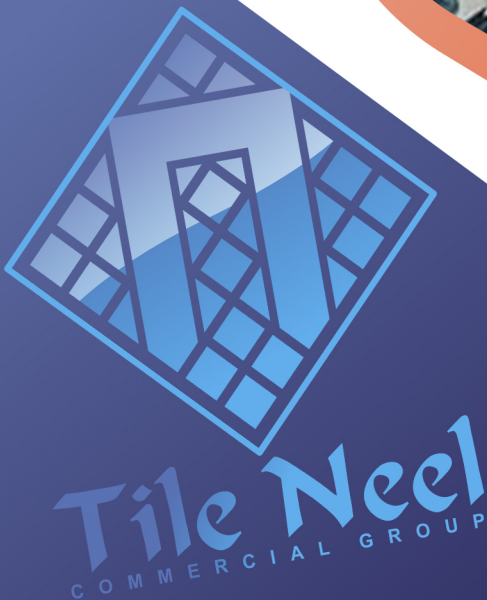

Neel company mosaic tiles are used to cover floors, walls or other surfaces. This type of tile is very resistant to shocks, pressure, scratches, and chemicals.

Types of ceramics

Porcelain ceramics:

Porcelain ceramics are made of clay and other natural materials that are heated in a furnace. These types of ceramics are very high resistant, easily cleaned, are resistant to moisture, are suitable for busy places and are produced in different colors, designs and types.

- Glass ceramics:

The Neel Trading Company offers glass ceramics in different designs, colors and dimension that give a special beauty and effect to the home or work environment.

Glass ceramics or glass mosaic is similar to ordinary ceramic, but with the difference that it is made of small glass, that is connected with a mesh and has a high beauty and brightness. This type of ceramic can be used in various places such as kitchens, bathrooms, elevators, luxury buildings, etc. These ceramics are very resistant to heat, are washable and have a consistent color.

- Granite ceramics:

Neel Company Granite Ceramic is made using granite stone design and is a type of porcelain ceramic that is produced in both matte and glossy forms and is very resistant to chemical and acidic solutions.
